OVERVIEW

PT. AULIA MULTI SARANA

We Are National Construction Services Contractor company in Indonesia.

PT. Aulia Multi Sarana is one of the civil and building contractors for major projects throughout Indonesia. We take an active role in the civil and building industry. In developing long-term relationships with our clients, to be able to provide excellent quality and service with timely and precise implementation of all products to achieve customer satisfaction.

Starting from a small business with experience in the field of construction, it has now grown into a company engaged in the field of civil & building contractors, which provides EPC and maintenance services.

Supported by professional and trained workers in the field of construction, as our commitment to complete every construction work that has been entrusted. Our role in completing construction works will also not go well without the support and good cooperation with all partners, the company's supply chain of materials and equipment and human resources who have high competence and loyalty. As a manifestation of the entire series of learning processes and company experiences through effective and efficient technology management and construction methods, we are ready to provide the best service to create leading works.

**PT AULIA
MULTI SARANA**

PROUD TO BUILD INDONESIA

PT. AULIA MULTI SARANA always strives to provide quality work results with reliable and competent human resources to provide satisfaction to partners and clients.

according to our motto:
PROUD TO BUILD INDONESIA

WE ARE INNOVATIVE SOLUTIONS FOR SUSTAINABLE GROWTH

Didi Aulia, SH. MM
President Director

To compete and continue its existence, work quality, results and service performance, continue to be improved to develop innovation and technology simultaneously to be the best. The company prioritizes a heartfelt approach and prioritizes high values towards honesty.

our HISTORY

Established since November 24, 2010, PT. AULIA MULTI SARANA is a CONTRACTOR company in the construction sector. Through a professional process, the company strives to be the best and at the forefront of competition in the construction services sector in Indonesia.

We also engage trusted partners with subcontractors who will provide valuable insights and excellent service. Our experienced experts have established a record of high integrity, expertise and excellent construction services to achieve satisfaction in the Indonesian construction industry.

PT. AULIA MULTI SARANA is a full service contractor providing, designing and constructing major projects. We are committed to building partnerships with our clients to provide excellent quality and service that exceeds customer expectations.

our VISION

With a clear vision to become a leading company that provides integrated services for all construction projects, PT. Aulia Multi Sarana strives to position itself as the best and determine its path to sustainable success.

To become the largest construction company, leading the change in the International construction industry

We want to be known as a construction provider with integrity, visibility, quality and on time.

A company that is fully committed to customer satisfaction by producing optimal quality work and providing the best service.

A company that prides its employees in working in the construction industry and continues to strive to be at the forefront.

our MISSION

**Providing
excellent
service in
construction
projects**

Having fully understood that customer satisfaction is considered as an effective tool to measure the equity of PT. Aulia Multi Sarana, the company is always committed to completing high-quality projects to its clients at competitive prices and upholding strict and measurable technical and aesthetic requirements.

We have developed our business by prioritizing humane and environmentally conscious values of life and aiming to bring prosperity to communities wherever the company operates.

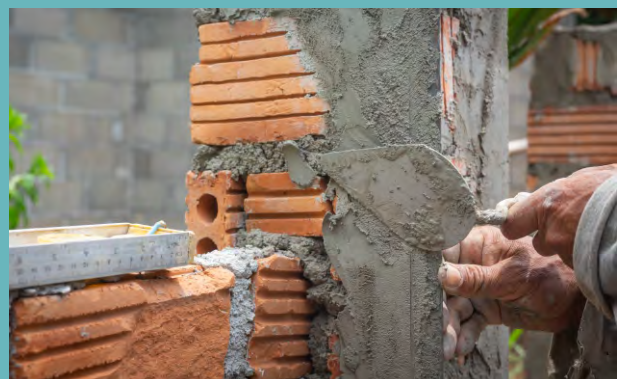

PROJECT VALUE

selection of the best project materials

In the construction process, we need a practical understanding of work methods and material knowledge. Mastery of these materials is very important to be economical, practical and in accordance with its purpose and function.

The best way to ensure satisfactory results in a project is to choose quality materials. The selection of quality materials will provide good results in terms of product quality so that the level of success of the work reaches satisfaction.

Another important factor for the success of a project is effective communication between the client, or Investor, or the contractor and the implementer. Between these parties, there needs to be a commitment to timely implementation and supervision to ensure that the quality of the materials supplied is of the desired quality.

EPC CONTRACTOR EXPERTISE

Combined with a wide range of functional expertise in different areas such as: design engineering, technical procurement, logistics, quality management and project execution planning consistently delivers customer satisfaction and demands projects with the highest technological standards.

ENGINEERING SCOPE

From conceptual project design to full detailed design of all aspects of a construction project.

CONSTRUCTION SCOPE

Includes construction activities, on-site and selected materials. Construction is managed by our dedicated team with specialist supervisors assigned with discipline.

PROCUREMENT SCOPE

Covers all aspects of the project procurement of the best materials and expediting the delivery of all materials and project equipment

MAINTENANCE SCOPE

Knowledge of maintenance and upkeep management that includes physical construction. Maintenance will greatly help achieve the safety and comfort of a project.

company CAPABILITIES

SOLID TEAM WORK

A team of know-how technical experts with years of experience. Our team has undergone intensive training in various fields of construction, construction methods, buildings and has extensive experience in various projects.

LATEST TECHNOLOGY

Modern technology & machinery: Our latest modern machinery and equipment have Indonesian national standards (SNI) and apply the latest design and manufacturing technology and research optimal solutions to perfect the product.

COMPETITIVE PRICE

Provides comprehensive solutions. We are proactive in consultation, design, production, construction, implementation to finishing. The prices we offer to customers are very competitive based on actual needs and conditions.

SAFETY FIRST

Working on Safety Management Work is first and foremost. The quality of construction must always be ensured in accordance with the commitments that have been set. All technical standards for safety and quality are supervised at the highest level.

INTERNATIONAL STANDARD

Establish, implement, maintain and continually improve an integrated management system in accordance with ISO 9001, 14001, 45001, to achieve high quality products to meet customer demands and regulations and legislation.

EXCELLENT PROJECT SOLUTION

Professionalism in construction work, on schedule. Before starting work, everything is prepared by the company's architects and engineers and has been planned to avoid unexpected cost spikes and minimize additional costs starting from the smallest thing.

projects EXPERTISE

One Point of
Contact for all
construction Projects

We are the main contractor of construction projects. We strive to continuously strive to offer quality by using our engineering expertise to produce innovative solutions that ultimately help control costs and risks.
